

Security & Powering In Our School

As school administrators and staff, we have many responsibilities and our children's safety is a top priority. At Kabouterland we prioritise to keep our children safe and to have appropriate systems in place to protect them from everything, from bullying to emergencies like natural disasters and accidents that may occur.

What we offer at Kabouterland in terms of security

- Anti Car Jamming Device
- Electrical fencing
- Kabouterland has high-definition security cameras in all our classes throughout the school
- Alarm system for the entire school
- For emergencies, we have a security company that will assist in minutes.

SOLAR ENERGY

Kabouterland is fully powered by inverters & solar panels.

- No load shedding - Power from our batteries and solar keeps the school's lights and appliances running so that our school is fully operational, not affecting our daily operations.
- As a renewable source of power, solar energy has an important role in reducing greenhouse gas emissions and mitigating climate change, which is critical to protecting humans, wildlife, and ecosystems. Solar energy can also improve air quality and reduce water use from energy production.
